DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-36 and 49-55, drawn to treating sleep disordered breathing using an inner control loop to provide treatment and an outer control loop to monitor the effectiveness of the treatment. It is considered that the use of inner and outer control loops comprise a first "special technical feature".

Group II, claim(s) 37-48 and 56-62, drawn to treating sleep disordered breathing using one of at least two treatment modes, and changing between the modes if necessary. It is considered that the use of two treatment modes comprises a second "special technical feature".

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The abovementioned groups of claims do not share any of the technical features identified, so a "technical relationship" between the inventions, as defined in PCT Rule 13.2 does not exist. Accordingly, the application does not relate to one invention or to a single inventive concept.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 3735

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
